WORK EXPERIENCE

Full Stack Developer Intern, DevX Days

Jan 2025 – Sept 2025

- Built responsive landing page using Next.js with TypeScript implementing SSR for improved SEO performance.
- Reduced page loading time by 40% through code splitting and lazy loading techniques.
- Implemented client-side caching strategies resulting in smoother navigation experience for users.
- Resolved cross-browser compatibility issues by creating custom CSS solutions for legacy browser support.

Frontend Developer Intern, Pixelwand

July 2024 – Dec 2024

- Developed AWS service migration UI with optimistic updates, reducing user wait time by 30%.
- Translated complex Figma design mock-ups into pixel-perfect web pages using React and styled-components.
- Created reusable component library that reduced development time for new features by 25%.
- Implemented responsive designs ensuring consistent user experience across mobile, tablet, and desktop devices.

AIML Trainee, Verzeo

Oct 2022 – Jan 2023

- Implemented object recognition model using TensorFlow and Keras achieving 87% accuracy.
- Documented model architecture and training process for team knowledge sharing.

PROJECTS

AI-Companion

- A full-stack application for real-time video calls with AI companions.
- Implemented real-time voice synthesis pipeline which responds to natural speech with optimized latency.
- Tech Stack:** React, TypeScript, Vite, Python, Supabase, WebRTC.

AssesMed

- A full-stack interface for machine learning-based disease prediction system.
- Implemented efficient caching mechanisms.
- Created intuitive UI flows that simplified complex medical input processes for non-technical users.
- Tech Stack:** TypeScript, Next.js, TailwindCSS, OAuth.

iCloud

- Developed comprehensive web application for college administrative operations.
- Query optimization and connection pooling.
- Implemented role-based access control system ensuring data security and privacy.
- Tech Stack:** PHP, CSS, MySQL, XAMPP, Apache Server.

SKILLS

- Technical Skills:** JavaScript, Typescript, Python, HTML5, CSS3, MySQL.
- Framework & Libraries:** React.js, Next.js, Node.js, Express.js, Redux API.
- Machine Learning:** TensorFlow, Keras, scikit-learn
- Tools:** Git, GitLab, Postman API Platform, Figma
- Misc. Skills:** Technical Documentation, Content Writing, Community Management, Prompt Engineering

COMMUNITY LEADERSHIP & ACHIEVEMENTS

- Postman Student Expert:** Mentored students on API testing methodologies, developed tutorial documentation for common API testing scenarios.
- OpenSourceDays Community Member & Co-organizer:** Coordinated volunteers & managed event logistics for 200+ attendees and created post-event documentation and success metrics.
- Co-organized technical event at Rungta College of Engineering featuring industry speakers including Github's Senior Manager & Developer Advocate and Postman's Senior Developer Advocate.
- Volunteered in [75th Republic Day](#) event hosted by Hon'ble Prime Minister, managed by NBCC.

EDUCATION

AIML (Extended Course)	IIT-Guwahati	2025-present	
B. TECH (Computer Science & Engineering)	Galgotias University, Noida	2021 - 2025	CGPA: 8.3/10
