

APOORV MAURYA

Full-Stack Engineer · AI-Integrated Products & Developer Tooling

apoorvmauryaapoorv@gmail.com | India | +91 7081817800 | [LinkedIn](#) | [GitHub](#) | [Twitter/X](#) | [Portfolio](#)

WORK EXPERIENCE

Full-Stack Developer Intern · DevX Days

Jan 2025 – Sept 2025

- Architected a fully server-side rendered marketing site in Next.js with TypeScript, ensuring all critical routes were pre-rendered directly improving the organic search discoverability and Lighthouse SEO scores.
- Engineered a SWR-based client-side caching layer that reduced average API calls per session by ~60% on repeat page visits, delivering near-instant navigation transitions between previously visited routes.
- Cut the initial page load time by 40% by implementing route-level code splitting and intersection-observer-driven lazy loading which measurably lowered the user bounce rates on high-traffic landing pages.
- Diagnosed and resolved rendering failures across Chrome, Safari, and Firefox in pre-existing codebase by authoring targeted CSS fallbacks and feature-detection polyfills, extending full product functionality to legacy browser environments.

Frontend Developer Intern · Pixelwand

July 2024 – Dec 2024

- Converted complex Figma designs into pixel-accurate React components using styled-components, validated pixel accuracy across the mobile, tablet, and desktop breakpoints via component-level QA.
- Designed and documented a reusable React component library that measurably reduced the feature development time by ~25%, establishing the team's shared UI standard across all client products.

PROJECTS

RetentIQ [[Live Demo](#)] · Next.js · Node.js/Express · FastAPI · scikit-learn · Llama 3.3 · Supabase · Docker · CI/CD Pipelines

- Architected an enterprise SaaS churn-intelligence platform combining a scikit-learn RandomForestClassifier trained on the customer event distributions with Groq LLM to produce enriched account health score.
- Created a database-backed async ingestion pipeline routing Stripe webhooks into a background job queue, decoupling data ingestion from the Express request thread and keeping the API non-blocking under concurrent loads.
- Shipped a cron-driven ROI aggregation engine with hourly MRR caching, Slack webhook and a 4-stage GitHub Actions CI pipeline covering lint, Vitest, Lighthouse audits, and Docker Compose build verification on every push.

Planora [[Live Demo](#)] · Next.js · TypeScript · Supabase · Llama 3.3 · Vercel AI SDK · Zustand

- Engineered a full-stack real-time collaborative trip-planning platform with AI-powered itinerary generation and an accountability system for asynchronous team coordination.
- Integrated Llama 3.3 via Vercel AI SDK to generate context-aware, preference-based travel itineraries, engineered a Momentum Engine - a custom automated email dispatch pipeline.
- Built conflict-free collaborative state sync using Supabase Realtime channels, enabling multiple users to concurrently edit shared itineraries without data-race inconsistencies or stale UI states.

AssesMed [[Live Demo](#)] · Next.js · TypeScript · Python · FastAPI · Supabase · TailwindCSS

- Built a full-stack clinical decision interface exposing FastAPI-served ML prediction models through guided & validated UI flows - abstracting complex diagnostic parameters into an accessible tool for non-technical clinical users.
- Implemented API-response caching at the FastAPI layer to eliminate repeated ML inference overhead, significantly reducing latency on high-frequency prediction queries.
- Designed a multi-step input form with real-time field validation and contextual help text, enabling clinical staff to operate the ML tool confidently without technical training or dedicated onboarding.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL

Frontend: React.js, Next.js (App Router / SSR), Tailwind CSS

Backend & Database: Node.js, Express.js, FastAPI, Supabase (PostgreSQL + Auth + Realtime + Edge Functions), MySQL

AI / ML: Vercel AI SDK, LLM Integration, scikit-learn

Tools & Platforms: Git, Vercel, Postman, Docker, Render, Figma

Misc: Technical Documentation, Content Writing, Community Management, Cross-Functional Collaboration

EDUCATION

IIT-Guwahati · Credit Linked AI/ML Extended Program

March 2025 – Present

Galgotias University · Bachelor of Technology (BTech) in Computer Science & Engineering

Oct 2021 – June 2025

COMMUNITY LEADERSHIP & ACHIEVEMENTS

- Postman Student Expert:** Mentored students across multiple college chapters on API design and testing; developed tutorial documentation for common integration scenarios, adopted as a standard onboarding resource.
- OpenSourceDays Community:** Member & Co-Organizer: Coordinated volunteers and managed end-to-end event logistics for 200+ attendees; authored post-event impact reports and success metrics that shaped planning for subsequent editions.
- Technical Event Co-Organizer, Rungta College of Engineering — Curated a speaker lineup including GitHub's Senior Manager & Developer Advocate and Postman's Senior Developer Advocate, bridging students directly with industry leadership.
